

## Compliance with ONC Certification Criteria 170.315(b)(10) – Electronic Health Information Export

### Certified Product Information

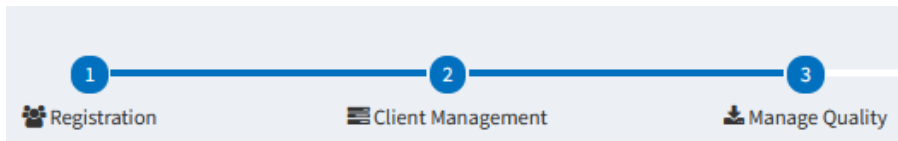

Developer Name: HealthAdvanta

Product Name: HealthAdvanta

Version: 4.0.5.0

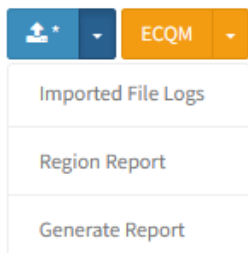

### Introduction

The HealthAdvanta Registry provides physicians, practice managers and quality reporting staff with the ability to easily export patient EHI through the web user interface. Data export functionality is available on stage 3, Manage Quality, of the registry user interface. Export of EHI data can be done either at the individual patient level or for all patients.

This is done through the Export button and the selection of Generate Report.

### Manage Quality *(TIN)*

## Compliance Features of HealthAdvanta

Exported data is in Excel format using CSV files. The Excel file contains multiple columns of data including:

### Practice/Provider

- Practice TIN
- Provider NPI
- Provider Name

### Patient

- Last Name
- First Name
- Middle Initial
- Date of birth
- Gender
- Primary Patient Identifier
- Secondary Patient Identifier

### Measure/Quality

- Measure identifier
- Date of service
- Place of service
- Procedure code
- Procedure modifiers
- Diagnosis codes
- Denominator status
- Numerator quality codes

## Security and Privacy Compliance

The EHI data export is delivered to the end user using end to end encryption through SSL (Secure Socket Layer) transport. It is the responsibility of the end user to ensure that data exported from our system remains secure.
